Dyfosit[®]
Reflects your movements

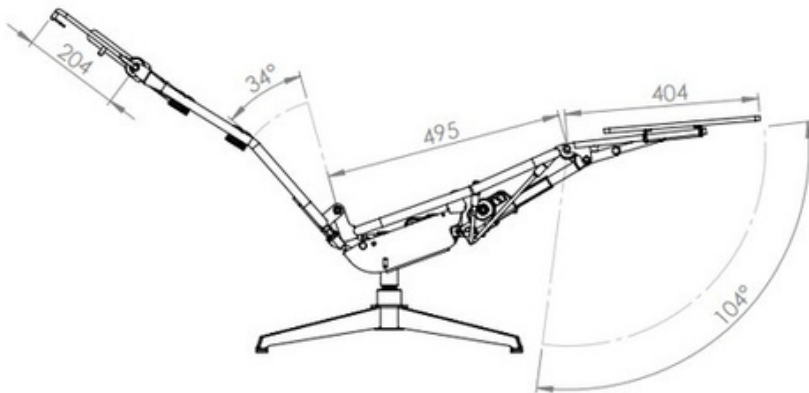

Comfort

- Smooth motorized reclining movement.
- Two-step movement – the seat changes angle when the back is reclined, providing incomparable comfort!
- Ergonomic and comfortable seating - decreased pressure on lower back and tailbone, naturally balancing your body.
- Clothing will be kept in place, shirt does not crawl up your back when reclining the chair.
- Does not get the feeling of slipping "out" of the chair after being seated a while.

Information

- Tested and approved according to NS-EN 16139:2013 European.
- Standard. Batteries have integrated fire-extinguishers. Built in sensors that continuously monitor battery temperature, will stop charging if it shows signs of overheating.
- Wireless remote control to recline back and elevate footrest.
- Motors can be controlled via IOS/Android app on smartphone.
- Sensory controlled movements in actuator, no mechanical switches.
- Great design freedom - few suspension points.
- The system is light weight.
- back- and seat frame tailored to design.
- Armrests are optional, can be mounted in back or seat frame.
- Comparable with different headrest solutions.
- Swivel base is available in three different heights.
- Suitable for molded foam.
- Steel frames and molds for foaming is created digitally.
